

A Commitment to the Community

The physicians and nurses at Penn Medicine strive to form long-term, collaborative relationships with the region's health care professionals. They routinely offer onsite educational programs, including seminars, workshops, trauma, critical care & emergency surgery case-based conferences, EMS appreciation events and grand rounds. The purpose of these programs is to provide the most current, clinically relevant information to the region's health care communities about critical and surgical injury and illness. Our programs are available to all regional, national and international health care practitioners.

Standard educational offerings include:

- **Advanced Surgical Skills for Exposure in Trauma (ASSET)**
- **Advanced Trauma Life Support (ATLS)**
- **Advanced Trauma Care for Nurses (ATCN)**
- **Advanced Trauma Operative Management (ATOM)**
- **The John Paul Pryor Memorial PennTRAC Conference**
- **The Penn Trauma & Critical Care Conference**
- **Disaster Management Emergency Preparedness (DMEP)**
- **Fundamental Critical Care Support (FCCS)**
- **Second Trauma Workshop (STW)**
- **Trauma Ultrasound Course**

and speak directly with an attending trauma surgeon, general surgeon, intensivist and flight operations.

Rapid, Easy Access to the Most Advanced Medical Care

For critically ill patients in need of immediate quaternary-level care, consider the vast, state-of-the-art resources at Penn Medicine.

- In-house attending physician coverage 24-hours a day, seven days a week
- Multidisciplinary team approach to care
- The most advanced specialty care in the region
- Ability to treat the highest acuity patients
- Excellent outcomes that rank well above national averages
- PennSTAR aeromedical coverage within a 150-mile radius
- Nationally ranked by *U.S. News & World Report*
- Magnet Award recognition for excellence in nursing care

Transferring a patient to a Penn Medicine hospital is easy and requires **only one call**. Experienced medical dispatchers are available around the clock to facilitate transfers quickly and efficiently. Staff can also arrange ground or air transportation, eliminating any type of time delay.
