RN@WLEDGE**LINK**

Purpose: This guide contains the best practices for naming items and curricula in Knowledge Link. Following a naming convention helps both Administrators and Learners be able to search and identify courses easily.

Note: If these guidelines are not followed, you will be asked to recreate your item or curriculum and all associated classes using these guidelines.

Title: Use a title that fits the course or curriculum content. It should be easy for a learner to search for and identify what the course is generally about.

Description: Provide a brief description of your course or curriculum including the target audience, objectives or goals, and any special instructions that the learner needs.

Course Owner and Contact's email: It is important to identify the course owner and provide a contact person's email address if any questions about the item or content arise. (Course Owner is a drop-down field and the list is presented on the next page.)

Item and Curricula ID: The ID characters identify the entity (HS-identifies the health system entity), the provider code see key below, whether it is an item or curriculum and the course code. The ID should be in all capital letters.

Entity.	Provider Code.	ITEM or CURR.	Course Code
HS.	20001.	ITEM.	EPIC151

Examples:

- HS.70001.ITEM.URO100 = item
- HS.10010.CURR.POCT100 = curriculum

Provider Codes:

Course Owners / Providers and corresponding Provider Codes are shown on the following pages. If you do not see the appropriate code listed here, please contact your entity's core Knowledge Link administrator.

Group	Provider Code begins with
Nursing	1
Information Services (IS)	2
Human Resources / PMA	3
LG Health	4
Risk/Patient Safety	6
Simulation	7
Princeton Health	8
Other	5
