

The Center for Health Equity Advancement Presents:

The 6th Annual Health Equity Week: The Historical Determinants of and Social Disparities in Healthcare

Achieving Health Equity

Achieving health equity means that we need to remove barriers to health such as poverty, lack of insurance, discrimination, inadequate housing and access to education.

To learn more about Health Equity, check out our printable tip sheet on Achieving Health Equity:

Tips for engaging your team:

What will I learn?

How to make steps in cultivating health equity within your department.

How can I incorporate this in my role?

At Penn Medicine we serve a diverse population, and it is crucial that we provide the most equitable patient care. Incorporating health equity tools benefit the patient and can improve care quality.

Questions for discussion:

What steps is my department currently taking to achieve health equity? How are we holding ourselves accountable?
