What will I learn?
Understanding racial disparities on all levels of the healthcare system and how to prevent potentially harmful or oppressive care delivery.

How can I incorporate this in my role?
The pandemic has disproportionately affected Black and Brown communities, communities that have long faced biases and inequities in health. It is up to us to understand the underpinnings of racism and build trust with our patients so we can provide the best level of care.

Questions for discussion:
What are some areas that need improvement in combating racism in our department?
